

Spybot Search & Destroy

Is **Big Brother** watching you? Well, stop him!

Spybot

Spybot—Search & Destroy is one of several programs that **detect and remove** spyware and adware from your computer. It also allows you to **immunize** your system from future spyware downloads. Best of all, Spybot, unlike other programs, does this with relatively little risk of unintentional deletion of important files.

To install Spybot on your computer:

1. Go to <http://download.com.com/3000-2144-10122137.html> OR another site for the free download (If you search for the download, be sure to search for the whole name—Spybot Search and Destroy).
2. Click Download Now.
3. Save the file to your computer (remember where you save it).
4. Double-click on the program (spybotsd12.exe or newer) to install it.
5. Follow the directions.

Be sure to **run and update** the program regularly to insure that your computer is spyware free.

Also, take time to immunize. This blocks future spyware downloads.
